July 7, 2016

Good Morning,

I know I was not on the happy side yesterday and I still think that this phase could have been "scheduled better" for a lack of better words, but what John did last night made a world of difference in our baking production. It had a huge impact, especially servicing the shore area on a crazy busy day. So I just want to thank you and John for going above and beyond yesterday and getting the oven running in time. Please pass this along to John as I do not have his email. Have a great weekend, talk to you next week!!!
